SUMMARY

Mechanical Engineering graduate (Cairo University) with hands-on experience across manufacturing, mechatronics, and IIoT-based projects, and a proven ability to turn data into actionable insights. Analytical, adaptable, and eager to learn, with strong communication skills and demonstrated leadership through academic and extracurricular teams, seeking to bring an entrepreneurial mindset to a cross-functional rotational program.

EDUCATION

Bachelor of Mechanical Engineering — Cairo University 2021 – 2026

EXPERIENCE

Mechanical Design Intern, Univest 2025
Internship, Arab Organization for Industrialization (AOI) Feb – Mar 2023
Learned about production plans, CNC machines, and operations at the aircraft factory.

Field Trip, Egyptian German Industrial Corporate (EGIC) Apr 2024
Field Trip, ROCKAL for Insulation Materials Apr 2025

PROJECTS

Graduation Project: Embedded Systems in an IIoT Environment 2025 – 2026
A smart platform that takes readings remotely to apply diagnosis and health assessment. Graded Excellent.

Robotic Arm for Automotive Assembly 2025

SKILLS

- SolidWorks
- FEA (Finite Element Analysis)
- Simulink
- C, C++
- Competitive Programming
- Arduino, ESP32
- ROS2
- IIoT Protocols (MQTT, OPC-UA)

COURSES AND CERTIFICATIONS

- ROS Mini Diploma, Sector B5 (Aug 2025 – Sep 2025)
- IoT Workshop, Sector B5 (Jul 2025)
- McKinsey.org Forward Program (Jun 2025 – Jul 2025)
- Research Day, Cairo University (Jan 2025)
- Automotive, Beta Academy (Jun 2023 – Jul 2023)
- Robotics Course, Beta Academy (Jul 2022)

VOLUNTEER EXPERIENCE

- Software Robotics Team, E-JUST (2025)
- Member, ASME – Research Team (2024)
- Member, ASME – CFD Team (2024)
- Member, DOSS – OC Team (2023)
